Re: Safety data sheets

Safety data sheets are sent to our customers on a regular basis.

The safety data sheet is issued when a product is purchased for the first time. It is only sent once, even if there are numerous deliveries of the product.

If the content of the safety data sheet is significantly altered, an update is sent to all customers who have ordered the product during the preceding 12 months (these alterations are included in the new version). If necessary, it can be addressed to a designated recipient.

In addition, a safety data sheet can also be issued upon specific request (individual customer request).

Please find enclosed the safety data sheet(s) for the following product(s):

Product name: PERKADOX GB-50L

Please ensure that these safety data sheets are distributed promptly to all persons responsible for occupational health and safety and product handling.

Yours sincerely

Omya Specialty Materials Inc.

This letter was produced automatically and therefore has no signature.

SAFETY DATA SHEET

according to the Globally Harmonized Systemand US regulation

PERKADOX GB-50L

2. HAZARDS IDENTIFICATION

Emergency Overview

Appearance	powder	
Color	white	
Odor	Faint.	
Hazard Summary	Risk of dust explosion.	

GHS Classification

Organic peroxides, Type D
Eye irritation, Category 2B
Skin sensitization, Category 1
Short-term (acute) aquatic hazard, Category 1
Long-term (chronic) aquatic hazard, Category 1

GHS label elements

Hazard pictograms

\(\frac{1}{2}\)

Signal Word

: Danger

Hazard Statements

: H242 Heating may cause a fire.

H317 May cause an allergic skin reaction.

H320 Causes eye irritation.

Revision Date 01/08/2020

Print Date 01/29/2020

US / Z8

H410 Very toxic to aquatic life with long lasting effects.

Precautionary Statements

Prevention:

P210 Keep away from heat/sparks/open flames/hot surfaces.

No smoking.

P220 Keep/Store away from clothing/ combustible materials.

P234 Keep only in original container.

P235 Keep cool.

P261 Avoid breathing dust or fume.

P264 Wash skin thoroughly after handling.

P272 Contaminated work clothing should not be allowed out

of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/ eye protection/ face protection.

Response:

P302 + P352 IF ON SKIN: Wash with plenty of soap and

water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and

easy to do. Continue rinsing.

P333 + P313 If skin irritation or rash occurs: Get medical

advice/ attention.

P337 + P313 If eye irritation persists: Get medical advice/

attention.

P363 Wash contaminated clothing before reuse.

P370 + P378 In case of fire: Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide to extinguish.

P391 Collect spillage.

Storage:

P410 Protect from sunlight.

P420 Store away from other materials.

Disposal:

P501 Dispose of contents/container in accordance with local

regulation.

Carcinogenicity:

IARC

: No ingredient of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed

human carcinogen by IARC.

OSHA

: No component of this product present at levels greater than or

equal to 0.1% is on OSHA's list of regulated carcinogens.

NTP

: No component of this product present at levels greater than or

equal to 0.1% is identified as a known or anticipated

carcinogen by NTP.

Revision Date 01/08/2020

Print Date 01/29/2020

3. COMPOSITION/INFORMATION ON INGREDIENTS

Pure substance/mixture

: Mixture

Hazardous ingredients

Chemical name	CAS-No.	Classification	Concentration [% W/W]
Ethylene glycol dibenzoate	94-49-5	Aquatic Chronic 2; H411	48 - 52
Dibenzoyl peroxide	94-36-0	Org. Perox. B; H241	48 - 52
		Eye Irrit. 2B; H320	
		Skin Sens. 1A; H317	
		Aquatic Acute 1; H400	
		Aquatic Chronic 1; H410	
		M-Factor (Acute): 10	
		M-Factor (Chronic): 10	

For the full text of the H-Statements mentioned in this Section, see Section 16.

FIRST		

General advice

: Move out of dangerous area.

Consult a physician.

Show this material safety data sheet to the doctor in

attendance.

Inhalation

: Remove to fresh air.

Keep patient warm and at rest. Rinse nose and mouth with water.

Skin contact

: Take off contaminated clothing and shoes immediately.

Wash the skin immediately with soap and water.

If skin irritation persists, call a physician.

Eye contact

: Rinse with plenty of water.

Remove contact lenses. Protect unharmed eye.

Keep eye wide open while rinsing.

Obtain medical attention.

Ingestion

: Clean mouth with water and drink afterwards plenty of water.

Never give anything by mouth to an unconscious person.

Obtain medical attention.

Notes to physician

Symptoms

: The symptoms and effects are as expected from the hazards

as shown in section 2. No specific product related symptoms

are known.

Risks

: May cause an allergic skin reaction.

Causes eye irritation.

Version 4

Revision Date 01/08/2020

Print Date 01/29/2020

US / Z8

Treatment

: Treat symptomatically.

5. FIRE-FIGHTING MEASURES

Suitable extinguishing media

: Use water spray, alcohol-resistant foam, dry chemical or

carbon dioxide.

Unsuitable extinguishing

media

: High volume water jet

Specific hazards during fire fighting / Specific hazards arising from the chemical

: CAUTION: reignition may occur.

Supports combustion.

Do not use a solid water stream as it may scatter and spread

Water spray may be ineffective unless used by experienced

firefighters.

Do not allow run-off from fire fighting to enter drains or water

courses.

Risks of ignition followed by flame propagation or secondary explosions shall be prevented by avoiding accumulation of

dust, e.g. on floors and ledges.

Hazardous decomposition products formed under fire

conditions.

Combustion products

: Fire will produce smoke containing hazardous combustion

products (see section 10).

Special protective equipment

for fire-fighters

: In the event of fire, wear self-contained breathing apparatus.

Further information

: Use water spray to cool unopened containers.

Collect contaminated fire extinguishing water separately. This

must not be discharged into drains.

Fire residues and contaminated fire extinguishing water must

be disposed of in accordance with local regulations.

See also Section 9. Physical and chemical properties: Safety data

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

Personal precautions

: Use personal protective equipment.

Wear respiratory protection. Avoid dust formation. Avoid breathing dust. Ensure adequate ventilation. Remove all sources of ignition.

Emergency measures on accidental release

Evacuate personnel to safe areas.

Only qualified personnel equipped with suitable protective

equipment may intervene.

Prevent unauthorized persons entering the zone.

Environmental precautions

: Prevent product from entering drains.

If the product contaminates rivers and lakes or drains inform

respective authorities.

Version 4

Revision Date 01/08/2020

Print Date 01/29/2020

US / Z8

Methods for cleaning up / Methods for containment

: Soak up with inert absorbent material and dispose of as

hazardous waste. Keep wetted with water. Confinement must be avoided.

Pick up and arrange disposal without creating dust. Keep in suitable, closed containers for disposal. Never return spills in original containers for re-use.

Reference to other sections

: For disposal considerations see section 13.

For personal protection see section 8.

7. HANDLING AND STORAGE

Handling

Advice on safe handling

: For personal protection see section 8.

Avoid formation of respirable particles.

Do not breathe vapors/dust.

Avoid contact with skin, eyes and clothing.

Keep away from heat/sparks/open flames/hot surfaces. No

smoking.

Smoking, eating and drinking should be prohibited in the

application area.

Open drum carefully as content may be under pressure. Dispose of rinse water in accordance with local and national

regulations.

Advice on protection against

fire and explosion

Use explosion protected equipment.

Provide appropriate exhaust ventilation at places where dust

is formed.

Keep away from sources of ignition - No smoking.

No sparking tools should be used.

Keep away from reducing agents (e.g. amines), acids, alkalies and heavy metal compounds (e.g. accelerators, driers, metal

soaps).

Do not cut or weld on or near this container even when empty.

Keep away from combustible material.

Temperature class

: It is recommended to use electrical equipment of temperature group T3. However, autoignition can never be excluded.

Storage

Requirements for storage areas and containers

: No smoking.

Keep in a well-ventilated place.

Keep in a dry place.

Electrical installations / working materials must comply with

the technological safety standards.

Store at room temperature in the original container.

Keep only in original container. Store away from other materials.

Maximum storage temperature:

: 25 °C (77 °F)

Other data

: Do not allow to dry out.

Hazardous substance

Substance name	CAS-No.	Value	Control parameters	Basis	Update
Dibenzoyl peroxide	94-36-0	Immediately Dangerous to Life or Health Concentration Value	1500 mg/m3	US IDLH	1995-03-01
	Further information	: Immediately Dangerous to	Life or Health Concent	rations (IDLH)	

Appropriate engineering controls

Explosion proof ventilation recommended.

Provide appropriate exhaust ventilation at places where dust is formed.

Ensure that eyewash stations and safety showers are close to the workstation location.

Personal protective equipment

Eye/face protection

: Tightly fitting safety goggles

Hand protection

: Glove material: Neoprene

: Glove material: Nitrile rubber

Skin and body protection

: Protective suit

Respiratory protection

: Use respiratory protection (air supplied respirator) unless adequate local exhaust ventilation is provided or exposure

assessment demonstrates that exposures are within

recommended exposure guidelines.

Hygiene measures

: Handle in accordance with good industrial hygiene and safety

practice.

When using do not eat or drink. When using do not smoke.

Wash hands before breaks and at the end of workday.

Wash contaminated clothing before re-use.

Environmental exposure controls

General advice

: Prevent product from entering drains.

If the product contaminates rivers and lakes or drains inform

respective authorities.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance

Form

: powder

Color

: white

Odor

: Faint.

Odor Threshold

: No data available

Safety data

Autoignition temperature

: Test method not applicable

Decomposition temperature

: SADT - (Self accelerating decomposition temperature) is the lowest temperature at which self accelerating decomposition may occur with a substance in the packaging as used in transport. A dangerous self-accelerating decomposition reaction and, under certain circumstances, explosion or fire can be caused by thermal decomposition at and above the SADT. Contact with incompatible substances can cause

decomposition below the SADT.

Self-Accelerating

decomposition temperature

(SADT)

: 55 °C

Viscosity, dynamic

: No data available

Viscosity, kinematic

: Not applicable

Explosive properties

: Not explosive

Oxidizing properties

: Not classified as oxidizing.

Active Oxygen Content

: 3.3 %

Organic peroxides

: 50 %

This material safety datasheet only contains information relating to safety and does not replace any product information or product specification.

10. STABILITY AND REACTIVITY

Conditions to avoid

: Do not allow to dry out.

Confinement must be avoided. Heat, flames and sparks.

Materials to avoid

: Contact with the following incompatible materials will result in

hazardous decomposition:

Acids and bases

Iron Copper

Reducing agents Heavy metals

Rust

Do not mix with peroxide accelerators, unless under controlled

processing.

Use only stainless steel 316, PP, polyethylene or glass-lined

equipment.

For queries regarding the suitability of other materials please

contact the supplier.

Hazardous decomposition

products

: Carbon oxides

Benzoic acid Benzene Carbon dioxide

Thermal decomposition

: SADT - (Self accelerating decomposition temperature) is the lowest temperature at which self accelerating decomposition may occur with a substance in the packaging as used in transport. A dangerous self-accelerating decomposition reaction and, under certain circumstances, explosion or fire can be caused by thermal decomposition at and above the SADT. Contact with incompatible substances can cause decomposition below the SADT.

Reactivity

: Stable under normal conditions.

Chemical stability

: Stable under recommended storage conditions.

Hazardous reactions

: Dust may form explosive mixture in air.

Self-Accelerating

decomposition temperature

(SADT)

: 55 °C (131 °F)

11. TOXICOLOGICAL INFORMATION

PRODUCT INFORMATION:

Hazard Summary

Acute toxicity

: Not classified based on available information.

Skin corrosion/irritation

: Not classified based on available information.

Serious eye damage/eye

irritation

Respiratory or skin

sensitization

: Causes eye irritation.

Respiratory sensitization: Not classified based on available

information.

Skin sensitization: May cause an allergic skin reaction.

Germ cell mutagenicity

Not classified based on available information.

Carcinogenicity

Not classified based on available information.

Reproductive toxicity

Not classified based on available information.

STOT-single exposure

Not classified based on available information.

STOT-repeated exposure

Not classified based on available information.

Aspiration hazard

Not classified based on available information.

Potential Health Effects

Inhalation

: Thermal decomposition can lead to release of irritating gases

and vapors.

Product dust may be irritating to respiratory system.

Skin

: Product dust may be irritating to skin. May cause an allergic skin reaction.

May cause skin irritation.

Eyes

: Causes serious eye irritation.

Version 4

Revision Date 01/08/2020

Print Date 01/29/2020

US / Z8

Ingestion

: May cause irritation of the mucous membranes.

Aggravated Medical

Condition

: None known.

Symptoms of Overexposure

: The symptoms and effects are as expected from the hazards as shown in section 2. No specific product related symptoms

are known.

Toxicology Assessment

Further information

Inhalation may cause central nervous system effects.

May cause damage to organs.

This product may cause adverse reproductive effects.

immune system effects

Expected to produce developmental effects.

blood effects Avoid skin contact.

Do not breathe vapors/dust. Wear respiratory protection.

Wear suitable protective clothing and gloves.

Carcinogenicity:

IARC

: No ingredient of this product present at levels greater than or

equal to 0.1% is identified as probable, possible or confirmed

human carcinogen by IARC.

OSHA

NTP

No component of this product present at levels greater than or

equal to 0.1% is on OSHA's list of regulated carcinogens.

No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated

carcinogen by NTP.

TOXICOLOGY DATA FOR THE INGREDIENTS:

Toxicology Assessment

Component: Ethylene glycol dibenzoate

CMR effects

: Carcinogenicity: Based on available data, the classification

criteria are not met.

Mutagenicity: Based on available data, the classification

criteria are not met.

Reproductive toxicity: Based on available data, the

classification criteria are not met.

Component: Dibenzoyl peroxide

CMR effects

: Carcinogenicity: Not carcinogenic.

Mutagenicity: Not mutagenic.

Teratogenicity: Did not show teratogenic effects in animal

experiments.

Reproductive toxicity: No evidence of adverse effects on sexual function and fertility, or on development, based on

animal experiments.

Print Date 01/29/2020

US / Z8

Version 4 Revision Date 01/08/2020

Test result

Component: Ethylene glycol dibenzoate

Acute oral toxicity

: LD50: > 2,000 mg/kg

Species: Rat

Method: OECD Test Guideline 423

Skin irritation

: Species: Rabbit

Result: No skin irritation

Method: OECD Test Guideline 404

Exposure time: 4 h

Eye irritation

: Species: Rabbit

Result: No eye irritation

Method: OECD Test Guideline 405

Exposure time: 1 h

Sensitization

: Local lymph node assay (LLNA)

Species: Mouse

Result: Not a skin sensitizer. Method: OECD Test Guideline 429

Repeated dose toxicity

: Species: Rat, male and female

NOAEL: 300 mg/kg LOAEL: 1,000 mg/kg Application Route: Oral Exposure time: 92 d

Number of exposures: 1 /day Method: OECD Test Guideline 422

GLP: yes

Germ cell mutagenicity

Genotoxicity in vitro

: reverse mutation assay

Bacteria Result: negative

Method: OECD Test Guideline 471

Chromosome aberration test in vitro

Human lymphocytes Result: negative

Method: OECD Test Guideline 473

In vitro gene mutation study in mammalian cells

mouse lymphoma cells

Result: negative

Genotoxicity in vivo

: Species: Mouse

Method: OECD Test Guideline 474

Dose: 2000 mg/kg total

Result: negative

Reproductive toxicity/Fertility

Test Type: reproductive and developmental toxicity study

Species: Rat, male and female

Application Route: Oral

Dose: 100, 300, 1000 mg/kg bw/day Frequency of Treatment: 1 daily

Print Date 01/29/2020

US / Z8

General Toxicity Parent: NOAEL (No observed adverse effect

level): 300 mg/kg bw/day

General Toxicity F1: NOAEL (No observed adverse effect

level): 300 mg/kg bw/day

Method: OECD Test Guideline 422

GLP: yes

Result: Animal testing did not show any effects on fertility.

Reproductive

toxicity/Development/Teratog

enicity

: Species: Rat, male and female

Application Route: Oral

General Toxicity Maternal: NOAEL (No observed adverse

effect level): 300 mg/kg bw/day

Developmental Toxicity: NOAEL (No observed adverse effect

level): 300 mg/kg bw/day

Method: OECD Test Guideline 422

GLP: yes

Result: No effects on fertility., No effects on reproduction parameters., Some evidence of adverse effects on development, based on animal experiments.

Component: Dibenzoyl peroxide

Acute oral toxicity

: LD50: > 2,000 mg/kg

Species: Mouse

Method: OECD Test Guideline 401

LD50: > 5,000 mg/kg

Species: Rat

Acute inhalation toxicity

: LC50 (Rat, male): > 24.3 mg/l

Exposure time: 4 h

Test atmosphere: dust/mist Method: OECD Test Guideline 403

Assessment: The substance or mixture has no acute

inhalation toxicity

Skin irritation

: Species: Rabbit

Method: OECD Test Guideline 404

Exposure time: 4 h Not irritating.

Eve irritation

: Species: Rabbit

Result: Irritation to eyes, reversing within 7 days

Sensitization

: Species: Guinea pig

Classification: May cause sensitization by skin contact.

Method: OECD Test Guideline 406

Local lymph node assay (LLNA)

Species: Mouse

Classification: The product is a skin sensitizer, sub-category

1A

Method: OECD Test Guideline 429

Germ cell mutagenicity Genotoxicity in vitro

: In vitro gene mutation study in mammalian cells

mouse lymphoma cells

Result: negative

Method: OECD Test Guideline 476

Genotoxicity in vivo

: Micronucleus test Species: Mouse

Method: OECD Test Guideline 474

Result: negative

Carcinogenicity

: Not classified due to data which are conclusive although

insufficient for classification.

Reproductive toxicity/Fertility

: Test Type: reproductive and developmental toxicity study

Species: Rat, male and female

Application Route: Oral

General Toxicity F1: NOAEL (No observed adverse effect

level): 500 mg/kg bw/day

Method: OECD Test Guideline 422

GLP: yes

Reproductive

toxicity/Development/Teratog

enicity

: Species: Rat

Application Route: Oral

General Toxicity Maternal: NOAEL (No observed adverse

effect level): 300 mg/kg bw/day

Embryo-fetal toxicity.: NOAEL (No observed adverse effect

level): 300 mg/kg bw/day

Method: OECD Test Guideline 414

GLP: yes

Target Organ Systemic

Toxicant - Single exposure

: Routes of exposure: Ingestion

The substance or mixture is not classified as specific target

organ toxicant, single exposure.

Target Organ Systemic

Toxicant - Repeated

exposure

: Routes of exposure: Ingestion

The substance or mixture is not classified as specific target

organ toxicant, repeated exposure.

Aspiration toxicity

: No aspiration toxicity classification

12. ECOLOGICAL INFORMATION

PRODUCT INFORMATION:

Ecotoxicology Assessment Additional ecological

information

: An environmental hazard cannot be excluded in the event of

unprofessional handling or disposal.

Very toxic to aquatic life with long lasting effects.

Notice to users: Do not release to water. (SDS)

Further information on ecology

Hazardous to the ozone layer

Regulation : 40 CFR Protection of Environment; Part 82 Protection of

Stratospheric Ozone - CAA Section 602 Class I Substances

Remarks : This product neither contains, nor was manufactured with a

13. DISPOSAL CONSIDERATIONS

Product

: The product should not be allowed to enter drains, water

courses or the soil.

Do not contaminate ponds, waterways or ditches with

chemical or used container.

Hazardous waste

Dispose of contents/container in accordance with local

regulation.

Contaminated packaging

: Empty remaining contents. Dispose of as unused product.

Do not burn, or use a cutting torch on, the empty drum.

Due to the high risk of contamination recycling/recovery is not

recommended.

Follow all warnings even after the container is emptied.

This data sheet contains changes from the previous version in section(s): Regulatory information

The information in this safety data sheet should be provided to all who will use, handle, store, transport or otherwise be exposed to this product. The user must determine the appropriate measures that need to be implemented for the use and handling of this product in the context of the user's operations and use of this product. The information contained herein supersedes all previously issued bulletins on the subject matter covered. If the date on this document is more than three years old, call to make certain that this sheet is current. No warranty is made as to the product's merchantability or fitness for any particular purpose, or that any suggested use will not infringe any patent. User must determine for himself, by preliminary tests or otherwise, the suitability of this product for his purposes, including mixing with other products. Nothing contained herein shall be construed as granting or extending any license under any patent.

The information provided in this Material Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates
